# 4. Looking Back
The YEAR it was.

This page as I mentioned in the previous prompt, overlaps in some areas as you may have been born on the same day that something very something significant happened in history.

The YEAR IT WAS is a page that you will design to highlight some of the major news stories or events that occured in the year your were born. After you have finished that year you may want to highlight any other signicant year of your life.

For now lets begin with the year you were born.

There are so many way you can construct this page so you can stray away from the below suggested sketch and do you own thing, after all this is the story you want told. Your way.

Before starting grab a computer and google what major events ocurred in the year you were born. Browse important and historic events, both around the world and in Australia. Who were the world leaders, famous birthdays or even notable deaths from that year.

Print out four or five photos from the events that you have chosen from the year you were born. To make if more personal, choose some that resonate with you, ones that mean something to you rather than a random event.

For example, if you happen to love Disney movies and you were born in 1966 then you might want to mention it was the year he died.

On another note if you were born in 1969 you probably would want to highlight this major event that has shaped history - it was the year man first walked on the moon.

They are so many events that changed the world in significant ways - things that affected the lives of millions around the world.

1914 - Start of World War

1933 - Hitler becomes Chancellor of Germany

1939 - Start of World War 11

1941 - Pearl Harbour

1945 - Atomic Bomb dropped on HIroshima

1949 - Indonesia get independence

1953 - Assassination of John F Kennedy

1973 - First hand held mobile phone

1989 - Fall of the Berlin Wall

2001 - 9/11 September attack

and down the track in the future sometime
2020 Covid-19 Pandemic

This website might be of some help.
